Term/Year	Grade	RIT	RIT Growth	Growth Projection	Percentile Range
Indicates the term and year in which the test event occurred. Keep in mind that if a term spans more than one year (for example, from 2009 to 2010), the latter of the two years is used. For example, WI10 reflects a term which begins on December 1, 2009 and ends on February 28, 2010. FA (Fall) WI (Winter) SP (Spring) SU (Summer)	Grade of the student when the test was taken.	Middle number is the student's RIT score. The numbers on either side of the RIT score define the score +/- the standard error. If retested soon, the student's score would fall within this range most of the time.	The growth in RIT points made between the two terms in the Growth Comparison Period.	Average growth of students who were in the same grade and began the same term at a similar RIT score, as observed in the NWEA norms study.	The number in the middle is this student's percentile rank, or the percentage of students who had a RIT score less than or equal to this student's score according to the NWEA norms study. The numbers on either side of the percentile rank define the percentile range (the RIT score +/- standard error). If retested soon, this student's percentile rank would be within this range most of the time.

Gray text identifies invalid tests as well as tests that are valid but do not provide growth data. These test results are excluded from summary statistics. A test may have been invalidated because test duration was too short, for example.
